

Solar Station PRO

Off-Grid Solar Trailer

Now Powered with T-Mobile SIM Card Connectivity

Supports **multiple mounted devices**
(lights, cameras, sensors, Wi-Fi)

Two telescoping masts extendable
up to 24 feet

Our biggest solar solution, offering 5kW
of power and backup generator

Masts can support **stadium lighting**

Enables Your Technology,
Anywhere

Wrap with your own
custom branding

Flexible rates - **buy or rent!** 📅 Daily | Weekly | Annually

Our most robust solution to make sure you are online and powered up, wherever you are.

With a combined 5000 watts of power delivery, you can power a single-family home's worth of appliances for 5 days. With the included generator backup, this trailer will meet most of your short-term use cases.

Whatever your project goals are, we can help you along in finding the proper configuration.

Encrypted Feeds for Secure Remote IoT
Management

On-premise or off-site data center and
cloud solutions - Up to 60 Days of Video
Storage Available

Collaborative Approach – We Design to
Your Needs.

We can haul and deploy or provide you with any stage of configuration – from only the trailer, to fully-outfitted and branded.

Supports:

- ✓ Any camera make and model
- ✓ Thermal Imaging and LPR
- ✓ Secure feed for data analytics and AI
- ✓ Up to ten days without sunlight – panels and generator ensure continuous operation for 10 days
- ✓ Internet-of-Things (IoT) Platform
- ✓ Emergency broadband applications – Use any available carrier and satellite for primary service with redundant backup
- ✓ Add a T-Mobile SIM Card for Nationwide 5G Connectivity
