

Witzense provides a suite of **IoT solutions** designed for a variety of industries, **focusing on improving efficiency and management** through cloud-based software and wireless technologies. Here's an overview of their products and services:

Witzense IoT Solutions:

IOT SENSORS FACILITY MANAGEMENT:

These sensors are designed to manage facilities by providing remote monitoring and alerts.

MULTI-LENS GPS DASH CAMERAS:

Aimed at enhancing fleet safety, these cameras offer multiple perspectives for better visibility and incident recording.

RFID INVENTORY TRACKING:

Utilize Radio Frequency Identification for efficient and accurate inventory management.

GPS ASSET TRACKING:

Track vehicles and assets in real-time, providing location alerts and improving asset management.

4G LTE CLOUD-BASED BODY CAMERAS:

These devices come with GPS tracking and push-to-talk radio, integrating video with location services.

Industries Served by Witzense:

Distribution: Witzense offers GPS solutions for route optimization and delivery efficiency.

Construction & Heavy Equipment: Their GPS tracking software enhances site productivity and equipment management.

Services & Specialty Trades: They provide comprehensive tracking and dispatch software for efficient resource management.

Transportation & Logistics: Witzense's software helps reduce fuel costs and improve compliance with navigation and driver safety.

Government & Public Safety: Their solutions aid in fleet tracking, emissions monitoring, and disaster response coordination.

Key Selling Points:

Witzense provides solutions that are cost-effective, rapid-to-deploy, and easy to use.

Their products are powered by AI and cloud-based software for increased intelligence and automation.

The company caters to a broad spectrum of industries, indicating a versatile application of their technology.

Contact and Corporate Information:

Witzense is based in Fort Lauderdale, FL, with operations in the US, Puerto Rico, Mexico, and the UAE.
