

360° Protection Camera Solutions

Smarter cameras. Sharper data. Fewer 'Oops, I didn't see that' moments. Get real-time visibility, crystal-clear footage, and insights that help your fleet run safer and smarter.

- **Free Hardware**
- **No Contracts**
- **Flexible Plan Options**

Surfsight Dash Camera- brings you the most advanced reporting features currently available in the video dash camera market. With HD video and cutting-edge data management programming, you can outfit your fleet with the peace of mind you need, without the expensive data costs or overages.

DCA01-SC and DCA01-RC (Aux Cameras)- are the ultimate solution for enhancing fleet security and visibility. The Side Aux Cam is designed for reliability, it connects via an Ethernet cable to ensure a stable and secure connection with a router, eliminating signal interference and guaranteeing consistent, high-quality footage. Provide your fleet with 360° video coverage.

RTR01-1000 (WiFi-Enabled Router for SS Dashcam Connectivity) - Enhance your fleet's video capabilities with a high-performance router, utilizing secure Ethernet connections to link aux cams to the router and via Wi-Fi to Surfsight dashcams. This solution ensures ultra-reliable, low-latency video streaming with max data security, eliminating interference or connectivity issues. Ideal for trailers, cargo monitoring, and rear-view coverage.
